

# HEAVY DUTY CATALOGUE 2025

AMORTISSEURS / SHOCK ABSORBERS / AMORTIGUADRES / STÖßDÄMPFER

## LA SIA EN BREF

La société Industrielle d'Amortisseurs a été fondée en 1989 en partenariat avec RECORD France. SIA est leader dans la fabrication et la commercialisation des amortisseurs au sud de la méditerranée. Elle fournit les principaux constructeurs automobiles européennes en pièces d'origine et de rechange, et assure la sous-traitance pour le compte des plus grands fabricants d'amortisseurs mondiaux.

Sa propre marque " SIA'AM " s'est imposée aussi bien à l'étendue locale en Tunisie que dans les marchés européens africains et arabes.

## ABOUT SIA

SIA (Société Industrielle d'Amortisseurs) a privately owned company in Tunisia, was founded in the early 1989's in partnership with RECORD France.

Over the last, SIA has become the most advanced and largest manufacturer of shock absorbers of the south Mediterranean. SIA has a customer base that includes major international automakers as an OE manufacturer and supplier.

The brand "SIA'AM", its homemade trademark, is among the most relevant brands in the Tunisia local market and is also capturing the European, African and Asian zones as well.

## FONCTION DES AMORTISSEURS

L'amortisseur est un dispositif destiné à limiter voir supprimer les chocs et les vibrations du véhicule. Il a pour mission de maintenir la liaison entre la roue et le châssis et de préserver ainsi la sécurité et le confort des passagers

## FUNCTION OF THE SHOCK ABSORBERS

The shock absorber is a device that reduces the shocks and vibration of the vehicle. Its mission is to maintain the connection between the wheel and the chassis and thereby preserve the safety and comfort of passengers.

## POURQUOI CHOISIR LES MARQUES SIA'AM & RECORD ?

- LA SIA est le leader dans la fabrication et la commercialisation des amortisseurs en Tunisie et en Afrique du nord.
- LA SIA est fournisseur des constructeurs automobile 1ère monte et pièces d'origine.
- LA SIA fournit les plus grands fabricants d'amortisseurs dans le monde.
- SIA dispose d'une large gamme avec plus de 3000 références et couvre plus que 90% du parc présent en méditerranéen.
- La SIA est capable de satisfaire les besoins de ses clients avec tous types d'amortisseurs bitubes aussi bien en hydraulique qu'en gaz.
- Des années d'expertise dans nos laboratoires ont permis l'optimisation de notre processus de fabrication conformément aux standards européens, afin de vous garantir un confort et une sécurisé irréprouchables.
- Le produit SIA est conforme aux standards européens réglementaires, sécuritaires environnementaux et légaux.
- Le système qualité SIA est certifié IATF 16949 (version 2016), ISO 14001 (version 2015) et ISO 45001 (version 2018).

## WHY CHOOSING RECORD/SIA'AM BRAND?

- SIA is the leader in manufacturing and commercialization of shock absorbers in Tunisia and North Africa.
- SIA is OEM and OES supplier
- SIA supplies the biggest shock absorber manufacturers in the world.
- SIA has a wide range with over 3000 references and covers over than 90% of parc the Mediterranean.
- SIA is able to satisfy the needs of its customers with twin-tube shock absorbers both in hydraulic and gas technologies.
- Years of expertise in our laboratories allowed the optimization of our manufacturing process according to the European standards in order to guarantee your comfort and safety.
- SIA product complies with regulatory, environmental and legal European standards.
- The SIA quality system is IATF 16949 (version 2016), ISO 14001 (version 2015) and ISO 45001 (version 2018) certified.

### Pourquoi remplacer les amortisseurs ?

- Des amortisseurs usés ou défectueux n'assurent plus une tenue de route optimale du véhicule.

### Quand remplacer les amortisseurs ?

Pour une utilisation optimale des amortisseurs et un diagnostic précis de leur état, il est conseillé de procéder au contrôle technique régulier tous les 20 000 km.

Le remplacement est recommandé au seuil des 80 000 km (ou tous les 4 ans), avant cette distance si l'environnement de la conduite est du type rude tel qu'en Afrique du nord, ou si vous constatez l'un des phénomènes suivant :

- Dépôt par l'effet d'un brusque changement de direction
- Distance de freinage rallongée
- Vibrations au volant
- Usure irrégulière des pneumatiques
- Balance importante en virage

### Why replacing the shock absorbers?

- Worn or defective shock absorbers provide reduce the contact of wheels with the ground

### When replacing the shock absorbers?

For an optimal use of shock absorbers and a precise diagnosis of their condition, it is recommended to carry out a regular inspection every 20 000 km.

The replacement is recommended at the threshold of 80,000 km (or every 4 years) before that distance if the driving environment is rough such as in North Africa, or as soon as you notice one of these anomalies:

- Unsteadiness due to a sudden change of direction
- Extended braking distance
- Vibration in the steering wheel
- Irregular wear in the wheels
- Significant swing in bends

### Les Technologies SIA'AM / RECORD pour les amortisseurs / The Shock Absorbers Technologies

### L'Amortisseur Hydraulique

- Amortisseur bi-tube avec réservoir de compensation et système hydraulique.

C'est la technologie d'amortisseur la plus répandue. Il s'agit de faire passer l'huile d'une chambre à l'autre par des diaphragmes qui créent une résistance hydraulique.

L'Amortisseur hydraulique propose une limitation des oscillations dues à l'état de la route, un freinage des mouvements du véhicule et une suppression des rebonds de la roue.

### L'Amortisseur à Gaz

- Amortisseur bi-tube avec système hydraulique pressurisé basse pression.

Il est basé sur le principe de l'amortisseur hydraulique. Il contient du gaz à basse pression au niveau de la chambre extérieure.

L'Amortisseur gaz améliore la performance lors du démarrage, atténue le bruit de véhicule et optimise la suspension de la voiture.

### The Hydraulic Shock Absorber

- Twin-tube Shock Absorber with catchup tank and hydraulic system.

This is the most widespread technology for shock absorbers.

It is about oil transfer from the rebound area to the compression area through the valves which create a hydraulic resistance.

The hydraulic shock absorber limitates the oscillations due to road conditions, brakes vehicle movement and eliminates the wheel bounces

### The Gas Shock Absorber

- Twin-tube sock absorber with pressurized hydraulic system .

It is based on the principle of the hydraulic shock absorber. It contains low pressure gas at the rebound room.

The gas shock absorber improves the performance when starting, softens the vehicle noise and optimizes wheels suspension.

## Recommandations de montage

### • Sécurité :

Les amortisseurs doivent toujours être remplacés par paire (avant ou arrière) pour garantir l'équilibre du véhicule, sa tenue de route, ainsi que l'efficacité de son freinage

### • Contrôles avant montage :

#### Vérifier :

- Le bon état du train avant et de la direction.
- L'absence de jeu dans les rotules et les barres d'accouplement.
- Le bon état des protecteurs, roulement, butées et autres organes de suspension extérieurs à l'amortisseur.
- Le degré d'affaissement des ressorts.
- Le gonflage des pneus et l'équilibre des roues.
- Le bon choix des références d'amortisseurs sélectionnées.

## Montage

Le sens du montage est indiqué par une flèche sur le corps de l'amortisseur

Faire fonctionner l'amortisseur à la main dans sa position normale de montage pour assurer son amorçage.

Utiliser l'outillage approprié lors du montage de l'appareil sur le véhicule.

#### NB :

- La tige de l'amortisseur ne doit en aucun cas être saisie avec une pince ou marquée par un outil
- Toute détérioration de son état de surface entraînerait la mise hors service du joint d'étanchéité et donc de l'amortisseur
- Remplacer tout kit de butée de suspension en mauvaise état : roulement bloqué ou palier usé peuvent provoquer la rupture de la fixation supérieure de l'amortisseur
- Remplacer tout kit de protection usé pour éviter la corrosion du chrome de la tige de piston et donc éviter toute fuite d'oléofluide
- Assembler tous les composants et accessoire de montage dans le bon ordre et la bonne position, et respecter les couples de serrage des boulons et écrous de fixation indiqués par le constructeur du véhicule, pour éviter tous risques de bruit de claquement ou de rupture de fixations. L'utilisation d'une clef à chocs est déconseillée.
- Ne pas bloquer les fixations d'amortisseur en position roues pendantes. Les bloquer impérativement roues au sol, le système de suspension se trouvant en position normale de fonctionnement.

### • Contrôles après montage

Après réglage de Jambes de Force Mac-Pherson à l'avant, vérifier le réglage du train avant

**NB :** Les amortisseurs usagés qui sont démontés contiennent de l'huile et peut-être du gaz. Ils doivent être éliminés selon les procédures spécifiées par la réglementation en matière de protection de l'environnement.

## Garantie

Ne pas tenir compte des recommandations ci-dessus peut invalider toute garantie

- Le produit SIA est garanti 1 an à partir de la date d'achat
- La garantie ne peut jouer si l'amortisseur a fait l'objet d'un usage anormal

## Fitting instructions

### • Safety :

*Shock absorber must always be replaced in pairs (front or rear) to maintain and ensure the vehicle balance, handling and braking efficiency.*

### • Before fitting :

#### check :

- *The good condition of the front axle and the steering*
- *That there is no play in the ball-joints and coupling rods*
- *The good condition of the shields, ball-bearings, bump stops and other associated suspension elements environing the shock absorber.*
- *That the springs have not given in.*
- *Tyre pressure and wheel balance.*
- *That the selected shock absorber part numbers are the right ones.*

### • Installation

*Hold the shock absorber in its normal position and make the oil circulate to prime the damper.*

*Use appropriate tooling during the fitting of the shocks on the vehicle.*

#### NB :

- *It is strictly forbidden to hold the piston rod with pliers or mole grips avoid any contact with tools*
- A dented rod puts the seals out of order, causes an oil leakage and therefore damage to the shock absorber*
- *Replace any top bearing kits in bad condition: a blocked bearing or a worn-out top plate set may lead to a snapping-off of the upper attachment.*
- *Replace any worn-out protection kits : this will prevent the piston rod chrome from being corroded, and therefore the damper from leaking.*
- *Please install all the mounting components & parts in the correct order and in the correct position, and please observe that the torque setting for the fixing bolts and nuts are tightened in accordance to the vehicle manufacturer's specifications, to avoid any risks of knocking noise and any risks of breaking-off of the attachment. The use of an air gun is not advisable*
- *Do not lock the attachments fully while the wheels are hanging. The final locking must be carried out with the wheels on the ground, in the normal functioning position of the suspension.*

### • After fitting

*When front Mac-Pherson struts are replaced, wheel-camber angle and steering alignment should always be checked.*

**NB :** *The worn shock absorbers which are removed contain oil and perhaps gas. They must be disposed of, according to the procedures by the environment protection regulations.*

### • Warranty :

*Not taking the above instructions into account may invalidate the warranty.*

- *The SIA product is guaranteed for one year from the date of purchase*
- *The warranty is not effective if the shock absorber has been submitted to an abnormal use or to operating conditions other than those specified by the manufacturer*

## LES DIFFÉRENTS TYPES D'AMORTISSEURS / THE VARIOUS TYPES OF SHOCK ABSORBERS

**SC : SUPER CONFORT**

**SÉRIES 10 0000**

Amortisseur télescopique avec des tarages étudiés dans un esprit seconde monte.  
*Telescopic shock absorber with damping forces engineered for replacement requirements.*

**GC : GRANDE CAPACITÉ**

**SÉRIES 20 0000**

Amortisseur de type " SC " avec capacité de fonctionnement renforcée.  
*" SC " type shock absorber with strengthened functioning capacity. (Heavy duty)*

**SR : SUPPORT DE RESSORT**

**SÉRIES 30 0000**

Amortisseur de type " SC " OU " GC " à fixations renforcées, livré avec coupelle support de ressort soudée ou amovible.  
*" SC " OR " GC " types shock absorber with reinforced attachments, supplied with welded or removable spring seat.*

**FU : FUSÉE**

**SÉRIES 40 0000**

Amortisseur cartouche pour suspension de type Mac-Pherson.  
*Insertable shock absorber cartridge for original Mac-Pherson type suspension.*

**JF : JAMBE DE FORCE**

**SÉRIES 50 0000**

Jambe de force complète pour suspension de type Mac-Pherson.  
*Complete sealed strut for original Mac-Pherson suspension.*

**RC : RESSORT COMPENSATEUR**

**SÉRIES 60 0000**

Amortisseur avec ressort compensateur de charge destiné aux véhicules qui fréquemment, transportent de lourdes charge, ou tractent des remorques ou caravanes.  
*Shock absorber with load compensator spring, designed for vehicles which, frequently, are heavily laden, or tow trailers or caravans.*

**PLL : POIDS LOURD LÉGER**

**SÉRIES 70 0000**

Amortisseur Télescopique avec tige et piston surdimensionnées pour une capacité de fonctionnement renforcée.  
*Telescopic shock absorber with overdimensioned shaft and piston for reinforced functioning capacity.*

**PL : POIDS LOURD**

**SÉRIES 80 0000**

Amortisseur Télescopique avec tige, piston et corps surdimensionnés pour une capacité de fonctionnement renforcée.  
*Telescopic shock absorber with overdimensioned shaft, piston and body for reinforced functioning capacity.*
